

IDL

Category: Licensed Application Software

DRAFT

This article is being reviewed for completeness and technical accuracy.

IDL is a software for data analysis, visualization, and cross-platform application development. IDL combines tools for any type of project, from "quick-look," interactive analysis and display to large-scale commercial programming projects.

For more information, please visit the [IDL home page](#).

There are 6 licenses available for 6 users to use IDL at the same time. If you are not able to use idl because the licenses are being used, try using it at a later time, or issue the command 'lmstat -a' to find out how many licenses are in use.
